

Hello there! I'm glad you have signed up for this interesting course on anatomy and physiology. I'm Justin and this is my colleague Missah and we will be your hosts for this course. We will take turns to present materials as we traverse through the different systems in our bodies.

We will review the following lessons in this chapter:

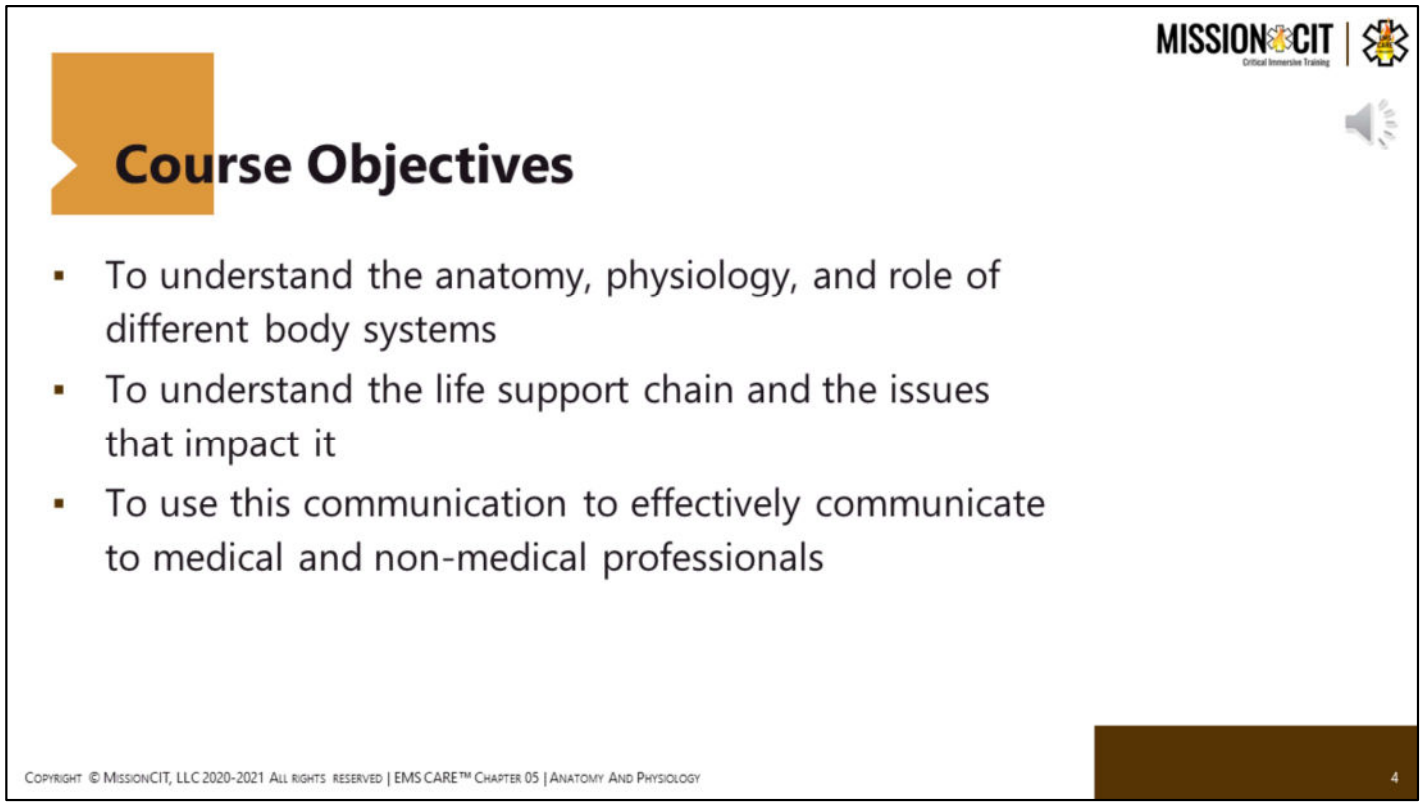

- Lesson 1: Musculoskeletal System
- Lesson 2: Respiratory and Circulatory Systems
- Lesson 3: Nervous, Integumentary, and Digestive Systems
- Lesson 4: Lymphatic, Endocrinal, Urinary, and Genital Systems
- Lesson 5: Life Support Chain

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills all the NREMT guidelines:

- Anatomy and Body Functions
- Standard Anatomic Terms
- Body Systems
- Life Support Chain – Fundamental Elements and Issues Impacting them
- Age-Related Variations for Pediatrics and Geriatrics

The objectives of this course are:

- To understand the anatomy, physiology, and role of different body systems
- To understand the life support chain and the issues that impact it
- To use this communication to effectively communicate to medical and non-medical professionals

Now that you have an idea of what to expect from this course, let's get started.
