Hello, and thank you for choosing this MissionCIT course. I'm Missah, and this is Justin. We're your hosts who'll be taking you through this material.

In this chapter, we take about sizing up the scene as soon as you enter, so you have an idea of the patient's state and condition. This is followed by both primary and secondary assessment where you drill down a bit to know the exact problem and its cause, so you can provide appropriate care.

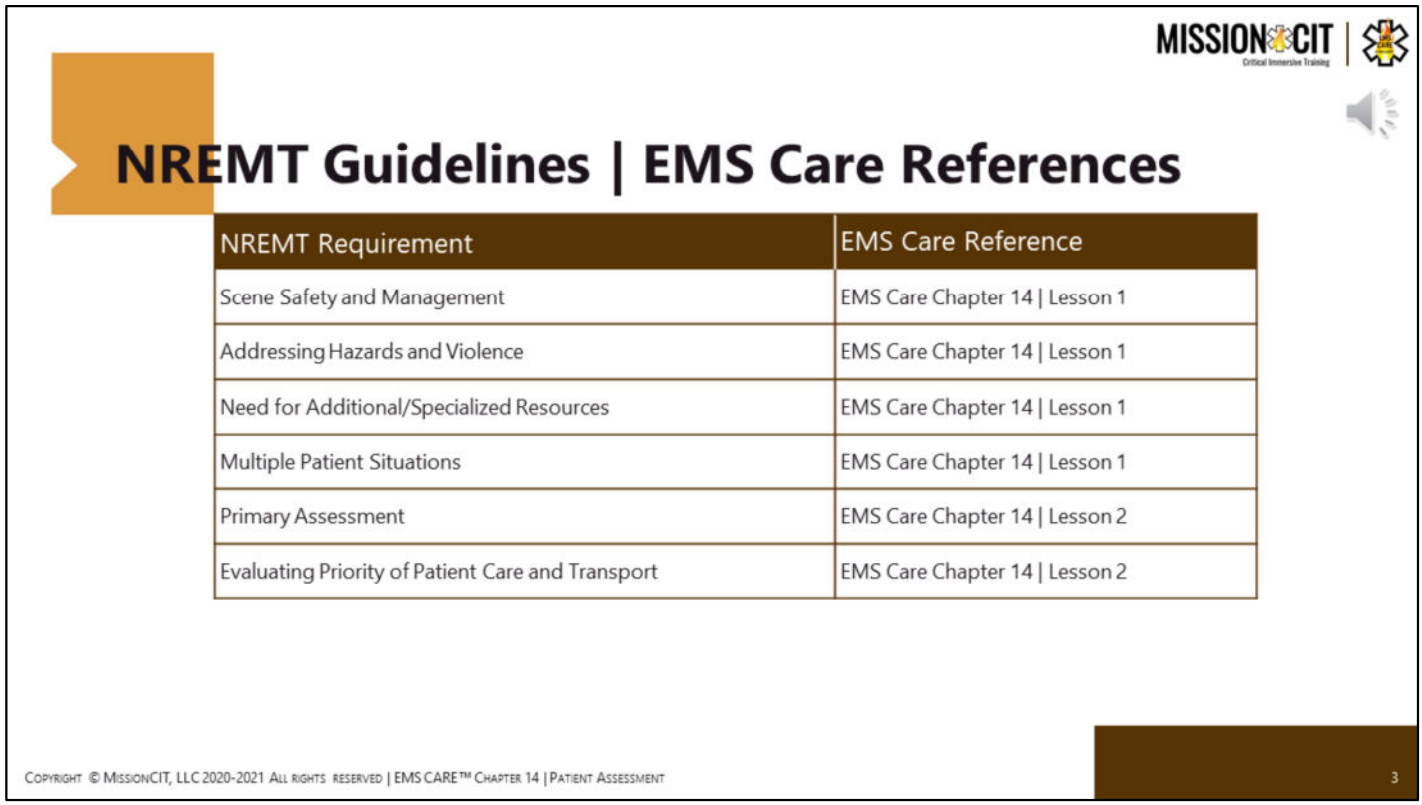

We're sure the material in this course will come in handy in many real-life situations, so pay attention as we take you through patient assessment.

We will review the following lessons in this chapter:

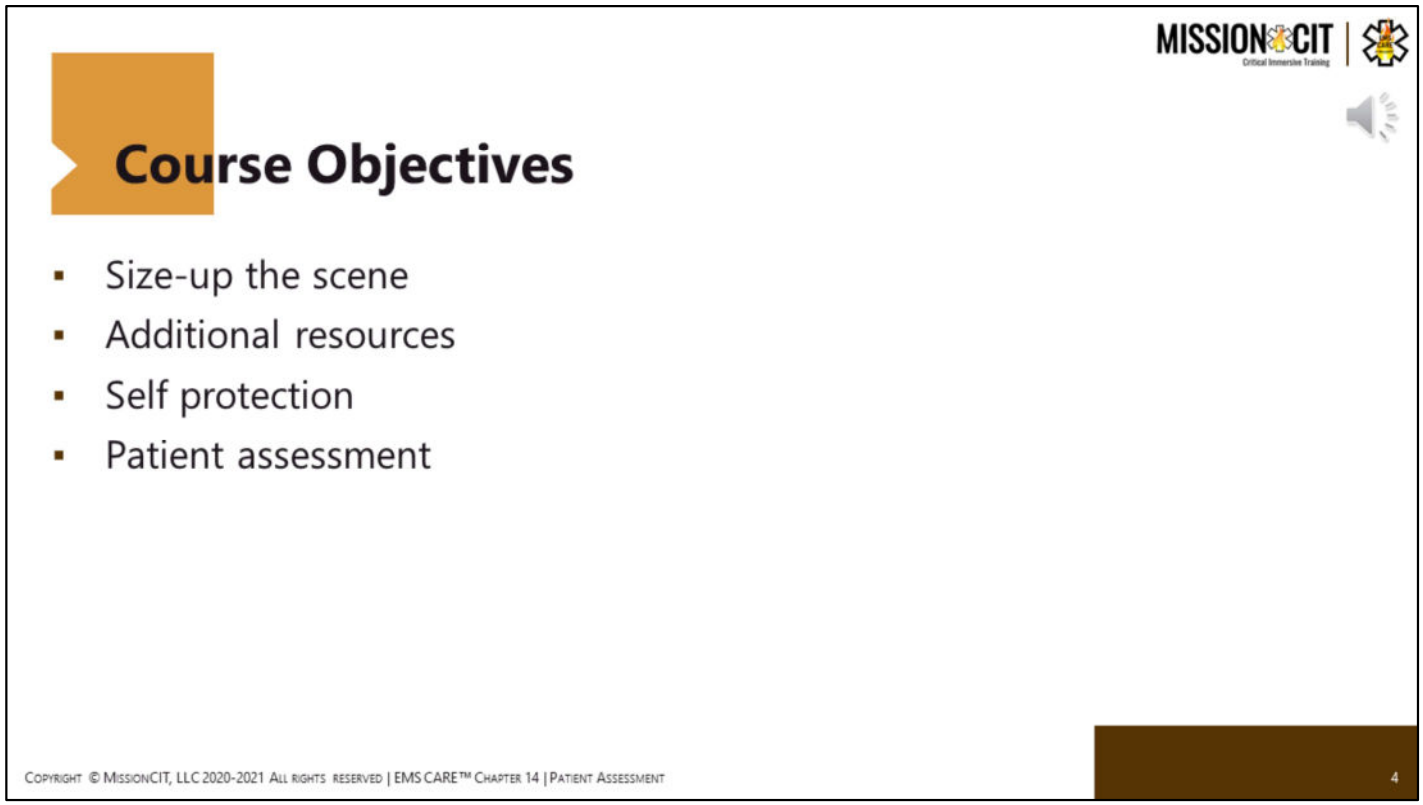

- Lesson 1: Scene Size-up and Safety
- Lesson 2: Primary Assessment
- Lesson 3: Secondary Assessment

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills all the NREMT guidelines:

- Scene Safety and Management
- Addressing Hazards and Violence
- Need for Additional/Specialized Resources
- Multiple Patient Situations
- Primary Assessment
- Evaluating Priority of Patient Care and Transport

The objectives of this course are:

- Size-up the scene and determine if additional or specialized resources are required
- Quickly identify and protect oneself from violent or hazardous situations
- Assess the patient to understand the problem, so appropriate care can be given

Now that you have an idea of what to expect from this course, let's get started.
