Hi there! Welcome to this MissionCIT course on Gastrointestinal and Urologic Emergencies where we talk extensively about the digestive and urinary systems in our body and the associated emergencies that you may encounter as an EMT. I'm Missah and this is my colleague Justin. We will be taking you through this course.

We will review the following lessons in this chapter:

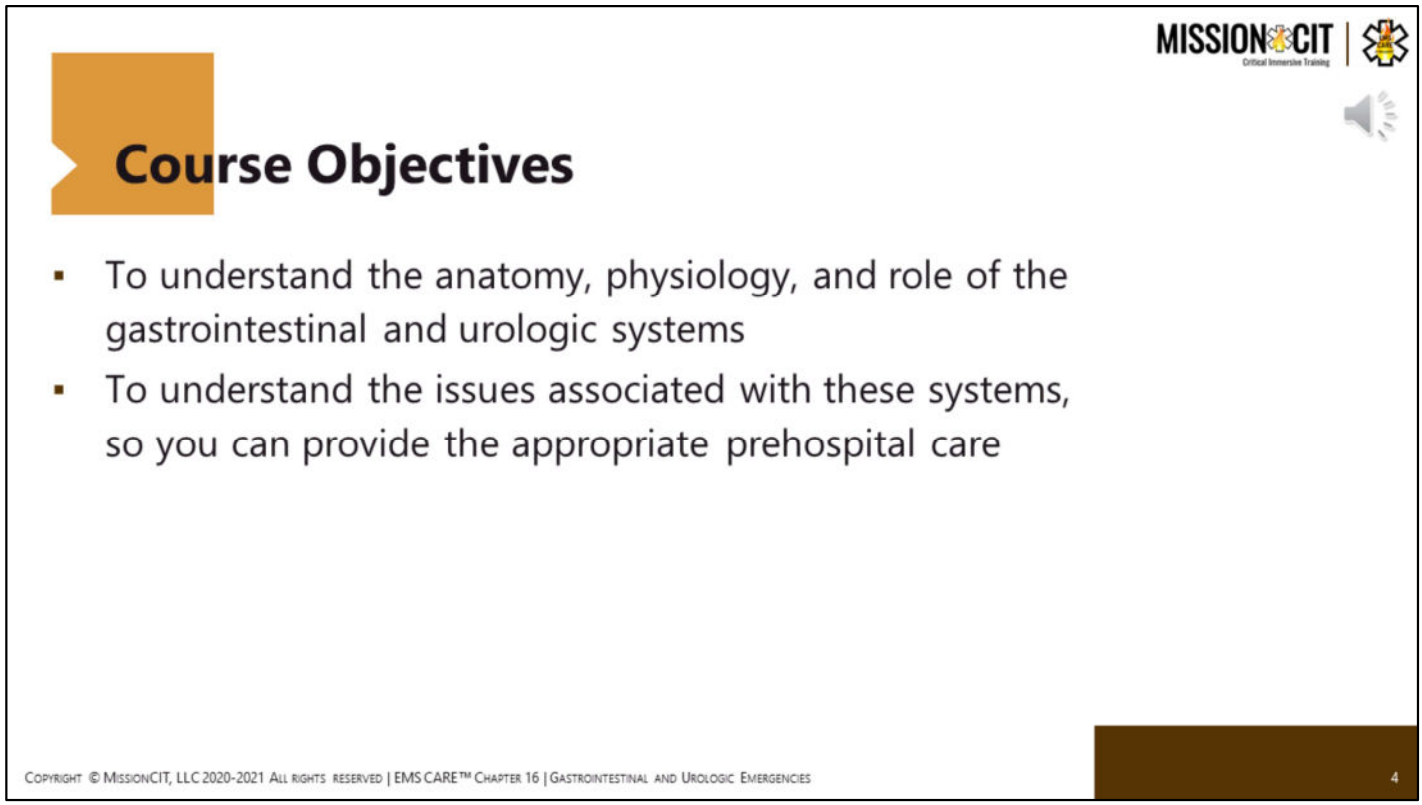

- Lesson 1: Gastrointestinal and Urological System – Anatomy and Physiology
- Lesson 2: Gastrointestinal Disorders
- Lesson 3: Urinary System Disorders

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills all the NREMT guidelines:

- Acute Abdomen
- Organs of the Abdominopelvic Cavity
- Acute Abdominal Condition

The objectives of this course are:

- To understand the anatomy, physiology, and role of the gastrointestinal and urologic systems
- To understand the issues associated with these systems, so you can provide the appropriate prehospital care

Now that you have an idea of what to expect from this course, let's get started.
