EMS Care
Ch 33

EMS CARE by MissionCIT

Copyright © MissionCIT, LLC 2020-2021 All rights reserved | EMS CARE™ Chapter 33 | Soft Tissue Injuries

Hello everyone! We're glad to have you at MissionCIT and thanks for joining us. In this topic, we'll be talking about soft tissue injuries that include both open and closed injuries, and how you can provide appropriate prehospital care in such situations. We will also be covering burns extensively, so you know what causes them and how best you can support patients suffering from them.

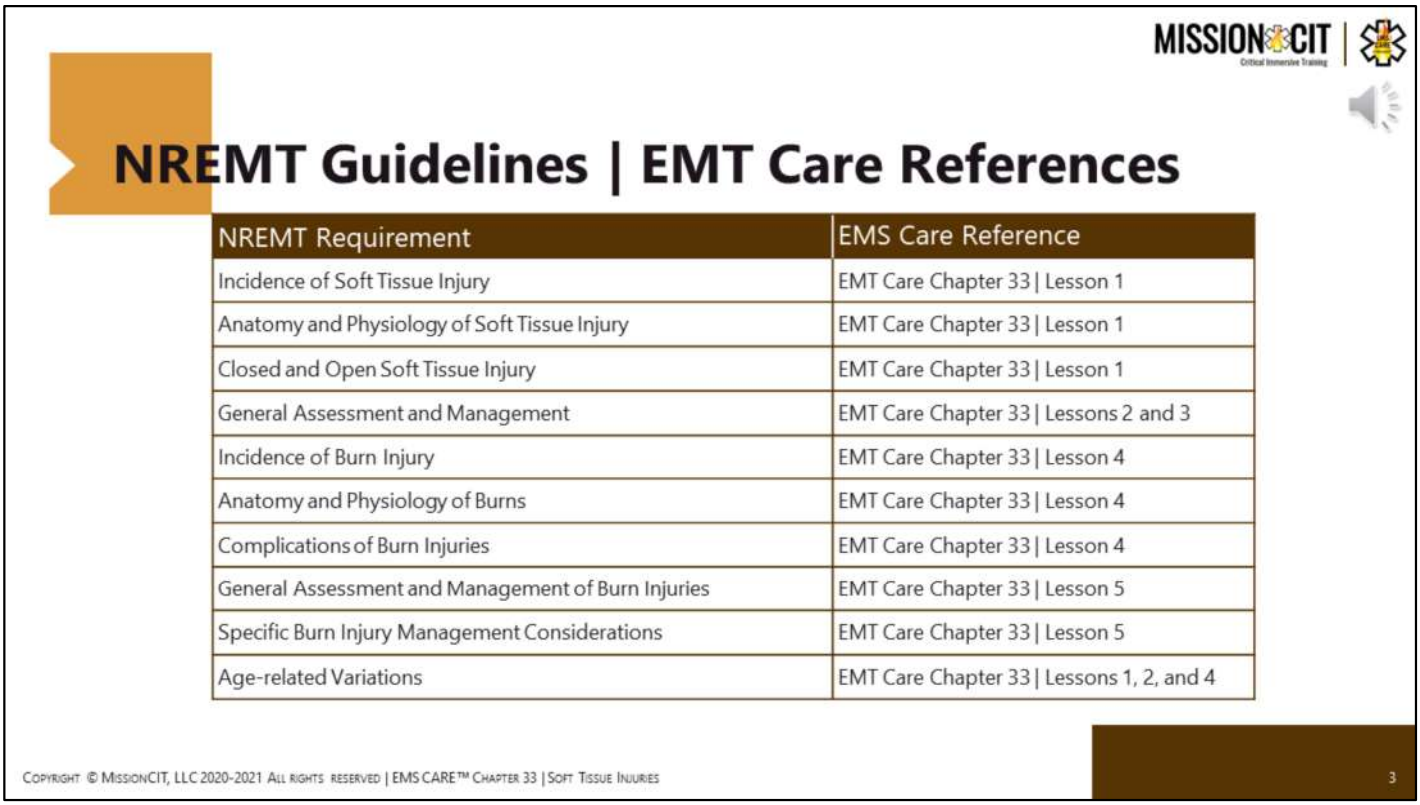

So, good studying!

We will review the following lessons in this chapter:

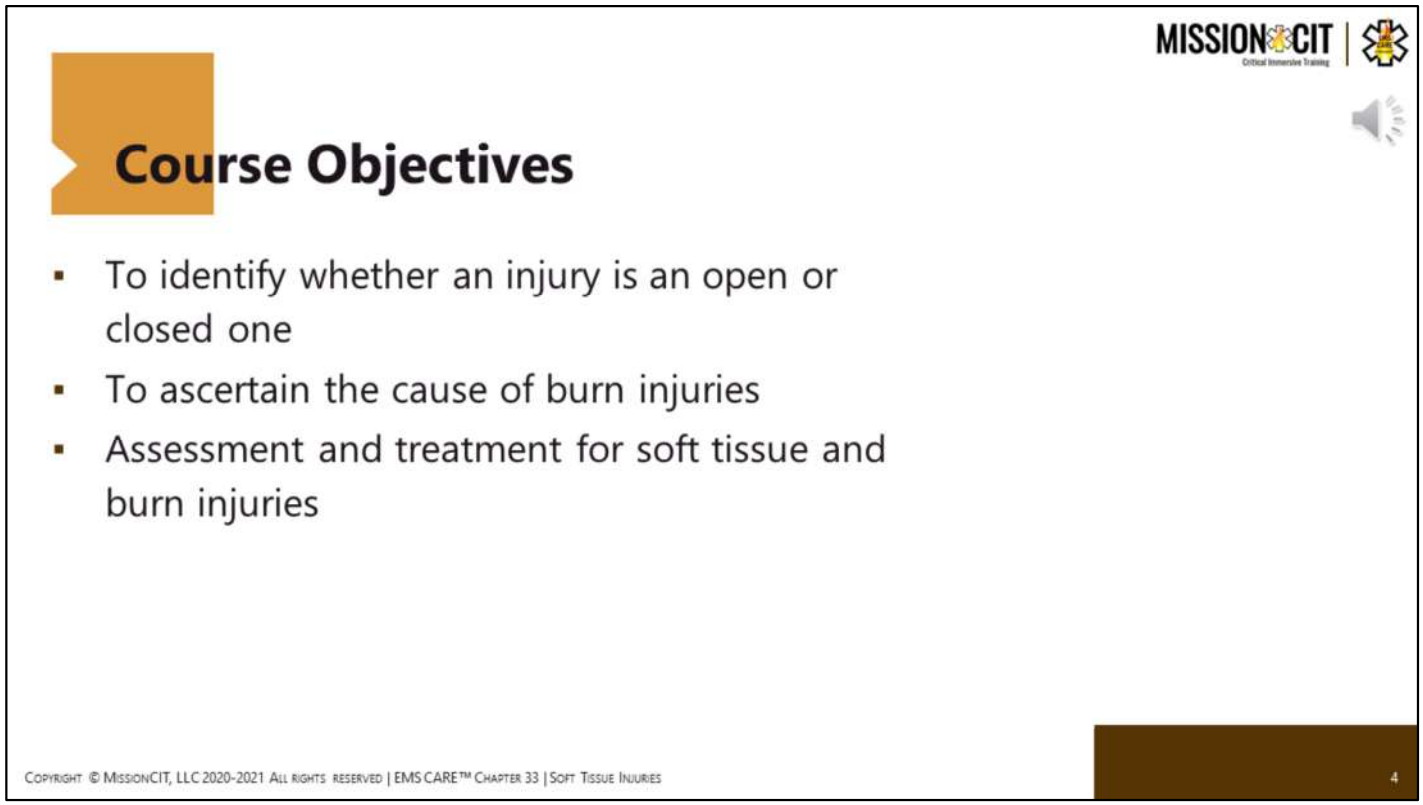

- Lesson 1: Open and Closed Injuries
- Lesson 2: Emergency Medical Care
- Lesson 3: Burns
- Lesson 4: Patient Assessment and Treatment

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills all the NREMT guidelines:

- Incidence of Soft Tissue Injury
- Anatomy and Physiology of Soft Tissue Injury
- Closed and Open Soft Tissue Injury
- General Assessment and Management
- Incidence of Burn Injury
- Anatomy and Physiology of Burns
- Complications of Burn Injuries
- General Assessment and Management of Burn Injuries
- Specific Burn Injury Management Considerations
- Age-related Variations

The objectives of this course are:

- To identify whether an injury is an open or closed one
- To ascertain the cause of burn injuries
- Assessment and treatment for soft tissue and burn injuries

With this, Justin will start with the first lesson on open and closed injuries.
