

Hello everyone! We're glad to have you at MissionCIT and thanks for joining us. Welcome to this course on face and neck injuries. These injuries can be immediately life-threatening and difficult to manage. They may be associated with vehicle accidents or violence.

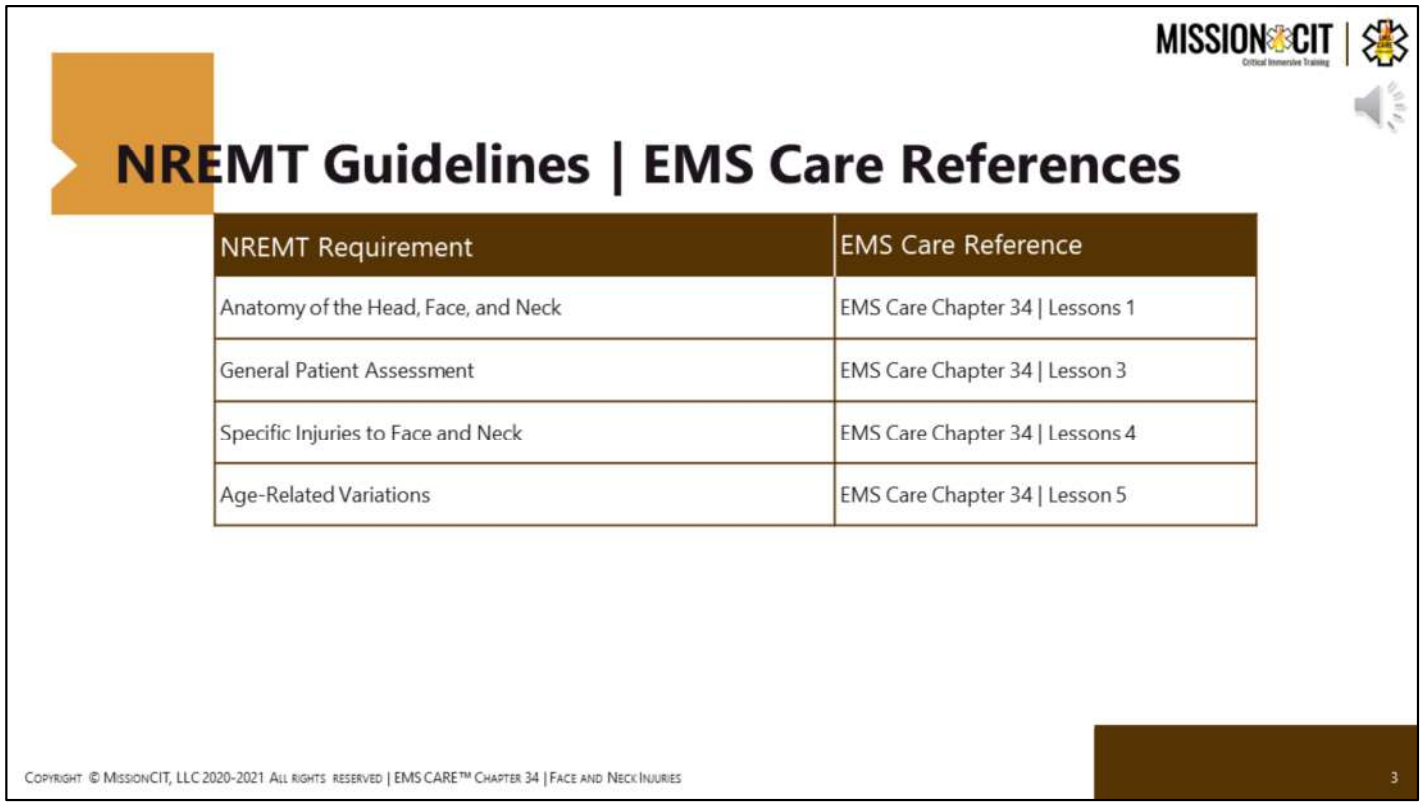

This topic will focus on the types of problems seen with serious injuries of the face and neck and the risk factors involved. Your role when dealing with these injuries is to assess the extent of the injuries and stabilize the patient so that no further injury occurs prior to arrival at a hospital.

We will review the following lessons in this chapter:

- Lesson 1: Anatomy and Physiology
- Lesson 2: Injuries of the Face and Neck
- Lesson 3: Patient Assessment and Care
- Lesson 4: Emergency Care for Specific Injuries
- Lesson 5: Special Considerations

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills the following NREMT guidelines:

- Anatomy of the Head, Face, and Neck
- General Patient Assessment
- Specific Injuries to Face and Neck
- Age-Related Variations

Now that you have an idea of what to expect from this course, let's get started.
