

Hello there! Welcome to this MissionCIT course where we will be talking about some of the common abdominal and genitourinary injuries and how you can care for patients suffering from them.

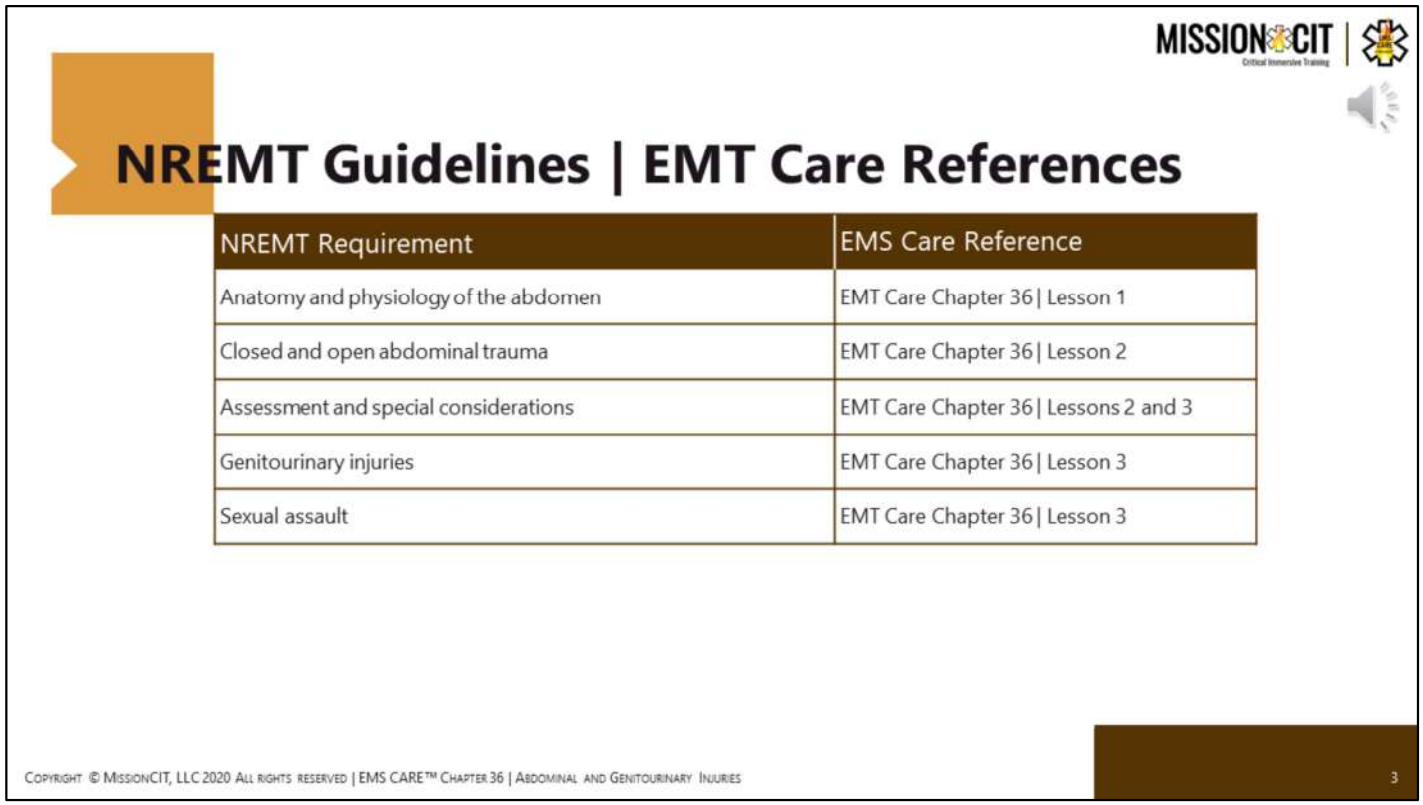

Are you ready to jump in?

We will review the following lessons in this chapter:

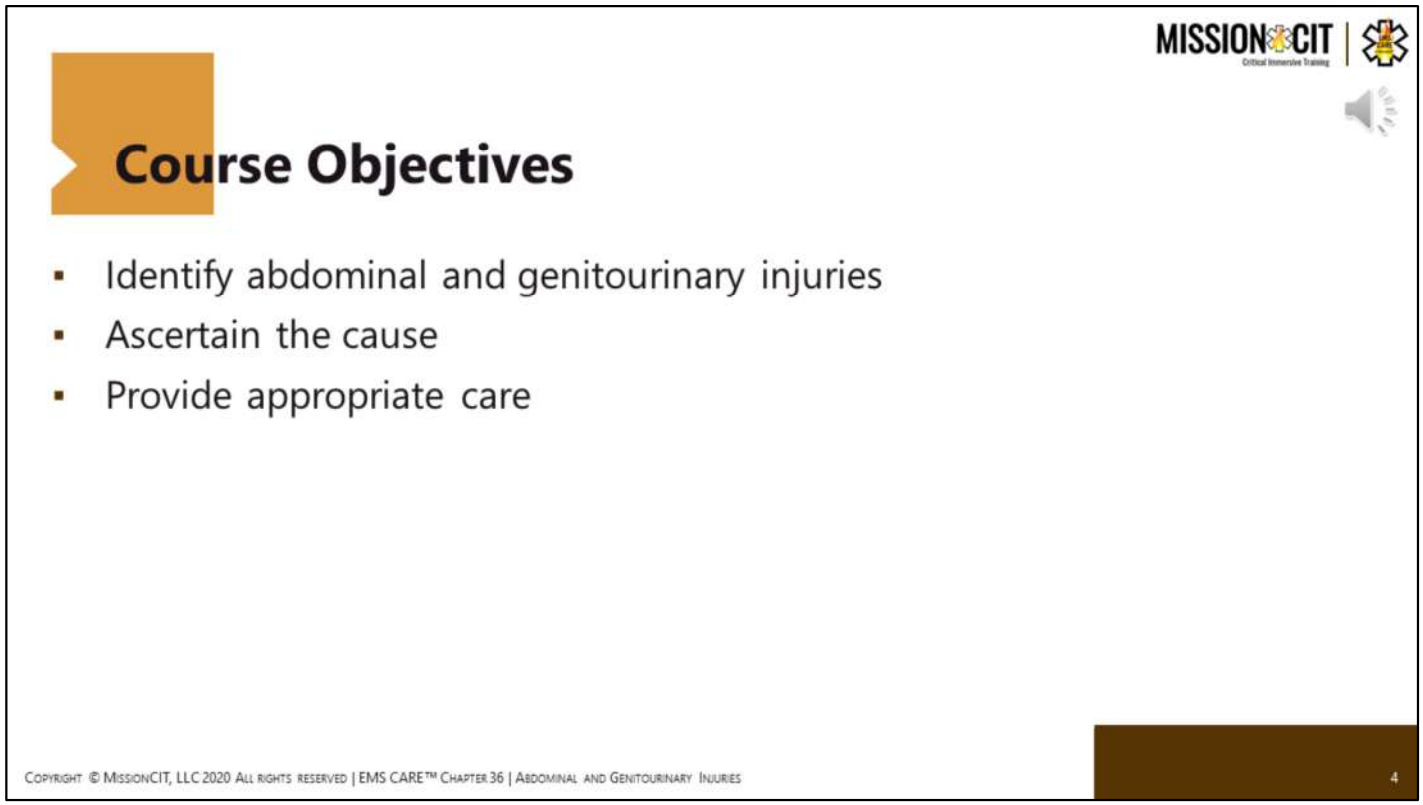

- Lesson 1: Anatomy and Physiology of the Abdomen
- Lesson 2: Abdominal Injuries
- Lesson 3: Genitourinary System

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills all the NREMT guidelines:

- Anatomy and physiology of the abdomen
- Closed and open abdominal trauma
- Assessment and special considerations
- Genitourinary injuries, and
- Sexual assault

The objectives of this course are:

- To identify abdominal and genitourinary injuries
- To ascertain the cause of these injuries
- To provide the appropriate prehospital care

With this, Justin will start with the first lesson on the anatomy of the abdomen.
