

Hi there! We're glad to have you here with us today on MissionCIT's Orthopedic Injuries course. I'm Missah and this is my colleague Justin, and we will be the hosts for this course where we will be talking about different kinds of musculoskeletal trauma such as strains, sprains, fractures, and more.

We will review the following lessons in this chapter:

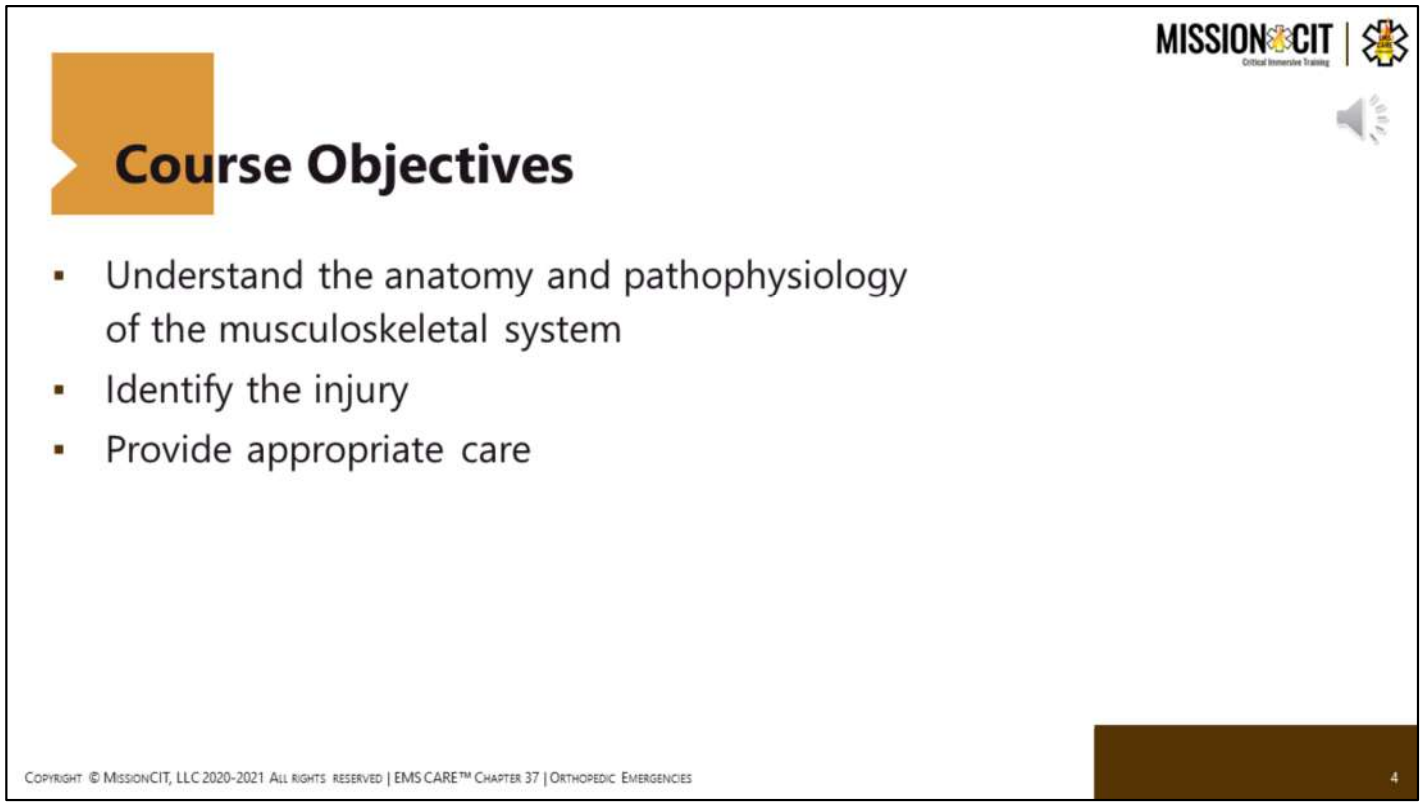

- Lesson 1: The Skeleton
- Lesson 2: Orthopedic Injuries
- Lesson 3: Patient Care

We complete our studies with a Chapter Review followed by a quiz. You will need to watch all the lessons, answer the interactive questions; and finally score a 75% grade or higher on the quiz, to get credit for this chapter.

This course fulfills all the NREMT guidelines:

- Incidence of Orthopedic Injury
- Anatomy and Physiology
- Mechanism of Injury – Orthopedic Injuries
- Complications
- Description of Fractures
- Dislocations
- Sprains/Strains
- Specific Injuries
- General Assessment and Management
- Types of Splints

The objectives of this course are to,

- Understand the anatomy and physiology of the musculoskeletal system
- Identify the injury
- Provide appropriate care for patients suffering from orthopedic trauma

Are you ready to get started?
